| **Product Name :** Packing Sleeve Inserting And Sleeve Shrinking Machine | **Product Code :** EQUP-MC20085-0024 |
|---|---|

**Description :**

Packing Sleeve Inserting And Sleeve Shrinking Machine

**Technical Specification :**

Output Per Hour  Up to 300 BPM
Direction  Left To Right , As per requirement
Label material  PVC, PET, OPS
Electrical rating  1.5KW-2KW
Voltage  AC 380 V
phase  3- phase

Fortunately, understanding these kinds of instruments like  Engineering is extremely straightforward; the critical step is to comprehend its innovation and why this innovation has made different organizations effective. Mark implements are manual, self-loader or programmed machines used to put pre-printed self-paced names on numerous sorts of items. As it were, it is utilized to quicken the technique for applying marks. That is the means by which association can spare a considerable measure of time and assets. By utilizing these tools, they will have the capacity to diminish their costs, increment their benefit and their effectiveness.
