

Product Name :
Agricultural Disk Plough

Product Code :
EQUP-MC20048-0009

Description :

Agricultural Disk Plough

Technical Specification :

- it is a plough which cuts tums and in some cases breaks furrow & like by means of separately mounted large steel discs.
- A Disk Plough is designed with a view to reduce friction by making a rolling plough bottom instead of sliding Plough Bottom.
- A Disk Plough works well in the condition Mould Board Plough does not work satisfactory.
- It is more useful for deep ploughing
- It can be used to stony and stummy soil without much danger of breakage.
- It works in loose soil also also (such as peat) without much clogging.
