

Product Name :
Agricultural Industrial Centrifugal Sifter Machine

Product Code :
EQUP-MC20052-0003

Description :

Agricultural Industrial Centrifugal Sifter Machine

Technical Specification :

Automation Grade	Semi-Automatic
Condition	New
Portable	Yes
Brand	Sifter International
Capacity	Customized

Industrial Centrifugal Sifter Machine is used in besan or flour mills. From our wide range of machines we offer optimum quality centrifugal machine. It is manufactured by using the best quality raw material and high end technology. We offer these machine in different models and other linked specifications, in order to meet up requirement of clients.

Salient Features of Centrifugal Sifter Machine:

1. High sieving capacity.
2. Easy cleaning and low in maintenance.
3. Separate product in different grades.
4. Low power consumption.
