

Product Name :
Food Sauce Ketchup Processing Plant

Product Code :
EQUP-MC20015-0002

Description :

Food Sauce Ketchup Processing Plant

Technical Specification :

We design, manufacture and export high-performance tomato processing equipment for the needs of the global tomato products industry. Our tomato processing machines are suitable for the production of derivative products including tomato concentrate, tomato paste, and tomato ketchup. We create robust machines that provide optimal functionality and require very low maintenance. Our range of tomato processing machines is utilised by various prominent food processing companies.

Our tomato processing plants are divided into several key sections which are segregated for tomato reception, processing, extraction of juice, evaporation, and packaging. Each of these sections and their sub-components performs designated actions to produce the desired tomato products. Our processing plants are highly-sophisticated machines for creating tomato products.
