

Product Name :
Al Foil EPE Sealing Machines Aluminum

Product Code :
EQUP-EP203190001

Description :

Al Foil EPE Sealing Machines Aluminum

Technical Specification :

This machine can be used to easy-tear lid, and especially suitable for bigger iron easy-tear lid, It can automatically complete the functions of cover feeding, punching, deep drawing, crimping, aluminum foil pre-sealing, sealing, embossing and output etc. Independent servo controls each function module, adjusts parameters separately, and achieves high-speed response and synchronous movement. Inclined punching arrangement makes the aluminum foil waste least.

Features:

Fully Automated with its Ability to Integrate Various Processes

Touch Screen System with PLC Controller.

Temperature controller regulates and shows the temperature.

Work in high speed that the fastest speed can reach 200 can/hour each unisea.l

High pressure, low temperature and the pressure-holding time is short which make highly seal.

An Emboss is followed by any other processes that are customized according by the manufacturer's needs.

Tim

Aluminum

Chromium Plate

Coated Steel Plate

Manufacturable Sealing Foil(film) Material:

Coated Aluminium Foil

PP Composite Aluminum Foil

Plastic Composite Film

Paper Composite Aluminum Foil

Working Process:

Lid dispensing

Punching

Deep drawing

Crimping

Punching&pre-sealing

Sealing

Embossing
