

Product Name :
Portable Drugs Detector

Product Code :
EQUP-MC20280-0010

Description :

Portable Drugs Detector

Technical Specification :

The one of the most advanced and cost-effective portable drugs detector available in the world, which adopts pseudo random sequence ion door-opening technology and Hardmard algorithm. These new methods are first applied to IMS detector both at home and abroad, which improve signal-to-noise and anti-interference ability dramatically, and reduces the false alarm rate. The devices are widely used by the governments worldwide to detect the presence of drugs and analyze which kind drug it

Technology: IMS and pseudo-random-sequence ion gate technology

Cold Start Time: Less than 15 minutes

Analysis Time: 4?10 seconds

Sensitivity: 10-10g

Sample Collection: Vapor and Trace Particle

False Alarm Rate: 1%

Display: 3.5 inches TFT color screen

Power Supply: AC 220V or Lithium battery

Battery: 16.8V/13Ah

Working Time: More than 3 hours

Weight: 4.6 kg (including 1.4 kg battery)

Operation Temperature: -20? to 40?

Relative Humidity: Detecting Capability: Heroin, Cocaine, Morphia, Methamphetamine, Ketamine, Amphetamine, Marijuana, Opium, MDA, MDMA, THC, DHE, etc.
