Product Name :
Portable Wide-Band Wireless Frequency Jammer

Product Code :
EQUP-MC20281-0010

Description :

Portable Wide-Band Wireless Frequency Jammer

Technical Specification :

This product has the small volume, the light weight, which is convenient for the individual soldier to carry. It is used to block communication and data transmission between all mobile phones (2G,3G,4G), which can prevent the scene of people from uploading photos to the Internet, public opinion fermentation. And also, it is helpful to dispose remote-controlled bomb controlled by mobile phone or mobile phone frequency band.

Operating mode: Switch the machine on and off at one key
Transmitted power: 450W (Subject to the goods delivered)
Power dissipation: MAX750W
Power adaptability: AC220V/DC24-26V
Electromagnetic compatibility in accordance with the relevant provisions of GJB157A.
Operation time: The built-in DC24V36AH power battery pack can support the equipment to work continuously for 50 minutes;
Built-in charger: 29.5V&2A Maximum charging time is 5 hours
Main engine weight: About 33kg
Main engine size: 63*50*30cm
Reliability and maintainability requirements: MTBF?1000 hours?MTTR?1 hour
Interference style: Frequency band block interference, sweep frequency interference
Working way: Sweep frequency, grooming spectrum and direct sequence spread spectrum are combined
Protection function: RF output no-load and short-circuit protection; The internal power supply system has the functions of under-voltage, over-voltage, overload, short-circuit and other protection and acousto-optic alarm.
Interference distance: 20-80m (The distance is related to the base station distance and whether there is a mobile phone amplifier)
