

Product Name :
Minesweeping and Military Mine Detector

Product Code :
EQUP-MC20282-0003

Description :

Minesweeping and Military Mine Detector

Technical Specification :

Mine detector is a widely used hand-held (single-soldier operating) mine detector. It adopts high frequency pulse induction technology and it is highly sensitive, especially suitable for detecting minor metal mines. The operation is simple, so the operators can use the device only after a short training.

Transport weight: 11 kg (device+case)

The detecting pole length: 1100mm?1370mm

Battery: 3LEE LR20 Manganese Alkaline dry cell

Battery life: At maximum sensitivity - 12 hours

At medium and low sensitivity: - 18 hours

Low voltage alarming by sound and light

Detection sensitivity: 0.05gr Stainless steel at 75mm distance from the probe

Operating humidity: Fully enclosed and be able to operate 2 m under water.

Operating temperature: -25°C?60°C

Storage temperature: -25°C?60°C

The detecting coil: The longest detecting pole is 965mm, the shortest is 695mm, and weight 1300g. Glass resin telescopic rod, the surface is coated to protect the environment. The size of detecting coil is 273mm*200mm, black ABS material, surface is treated with EMC, and a hybrid RX coil is used to improve the signal/noise ratio.
