

Product Name :
Bomb Suppression Blanket and Safety Circle

Product Code :
EQUIP-MC20282-0036

Description :

Bomb Suppression Blanket and Safety Circle

Technical Specification :

The product is composed of explosion-proof blanket and explosion-proof fence. The inner core of explosion-proof blanket and explosion-proof fence is made of special materials, and high-strength woven fabric is used as inner and outer fabric. The PE UD cloth with superior explosion-proof performance is selected as the basic material, and a special sewing process is adopted to ensure the full absorption of the energy generated by the explosive fragments.

Blanket outline size??1600mmX1600mm

Inner diameter of bomb suppression blanket fence:inner diameter of inner fence?450mm;inner diameter of outer fence ?600mm

Blanket and fence weight:?29.75kg

Water seepage performance of blanket and coat materials,hydrostatic pressure:?12Kpa

Breaking strength of blanket and fence materials:radial:3040N,zonal:1930N

Tearing strength of blanket and fence materials:warp:584N,latitude:309N

Anti-explosion performance:When the 82-2 style grenade is detonated,there is no puncture hole on the simulated target.
