

Product Name :
Automatic Shrink Sleeve Labelling Machine

Product Code :
EQUP-MC20075-0017

Description :

Automatic Shrink Sleeve Labelling Machine

Technical Specification :

The new device is designed, according to all-wheel drive and self-centering, to meet the requirements of the truck pressure. And the design of the speed ratio is completely realized that set of standard, send standard smooth, stable operation, cut standard fast of label purpose.

1 · all can manual or automatic continuous production, automatic state the machine according to the installation of label machine before and after block, plugging bottle of bottle on the assembly line sensors how many automatic rev. Stop into bottles of screw. To achieve automatic production. Vivid speed according to the production of: speed requirements to control the speed of slow progress, conveying operation completely humanization.

2 · the whole machine fault automatically detect: cooperate with human-computer interface Chinese display and three color lamp alarm prompt, can prompt the searching out equipment breakdown reason.

3 · the machine set of institutions: the conveyor belt conveyor belt, take a bottle of positioning, bottle dividing screw, film conveying system, based on frequency control the transmission motor synchronizer only a knob speed, and can be easily adjusted the machine running speed.
