

Product Name :
Food Double-Layered Pot

Product Code :
EQUP-MC20077-0006

Description :

Food Double-Layered Pot

Technical Specification :

Stainless steel double-layered pot is also called double-layered steam pot, which is applied widely for the processing such products as candy, medicine, dairy, alcohol, cake, beverage, sweetmeat, can, etc. It is also used to boil water, cook, stew, boil porridge, etc in great scale dining-room or eatery, which is a choiceness equipment, which is a choiceness equipment in food processing to advance quality, shorten time, improve labor condition. Characteristics: This pan takes a certain pressure steam as the main source, which is with many characteristics as big heated area, high thermal efficiency being heated evenly, short time of boiling, temperature being controlled easily. Inner layer pan body is made up of acid-resistant and the beautiful figure, easy installation, simple operation, on the safe side.

Metric volume(L)	Dimension Diameter x depth (cm)	Form	Working air pressure(Mpa)	Agitation speed(r/min)	Max tilt angle	Pipe diameter of inlet and outlet (inch)	Power of motor(kw)
100	66.4x48.2	Tilting	0.3/0.5	36	90°	1/2?	0.5
		Fixing			90°		
200	85x57.5	Tilting	0.3/0.5	36	90°	3/4?	0.7
		Fixing			90°		
300	100x65	Tilting	0.3/0.5	36	90°	3/4?	0.9
		Fixing			90°		
500	110x85	Tilting	0.3/0.5	36	90°	3/4?	1.2
		Fixing			90°		
600	120x95	Tilting	0.3/0.5	36	90°	3/4?	1.5
