

Product Name :
Drinking Water Reverse Osmosis Purification System

Product Code :
EQUP-MC20081-0002

Description :

Drinking Water Reverse Osmosis Purification System

Technical Specification :

The reverse osmosis purification device is an equipment to purify the saline water under the action of pressure difference of semi permeable membrane. It is called reverse osmosis, as it is counter to natural penetration direction. Different materials have different osmotic pressures. The reverse osmosis method to adopt larger osmotic pressures id used to obtain the purpose to separate, extract purify and condense.

More than 97% soluble salts and 99% glues, microbe, particulate and organic substances, etc can be removed by the reverse osmosis. It becomes the most idea equipment for modern pure water, hyper pure water, and airspace water. The remarkable characteristics of the equipment are shown as lower energy consumption, no pollution, simple techniques, high quality water, easy operation and maintenance.

Process capacity(t/h)		1000	3000	500	10000
Mechanic filter		400x1500	600x1500	800x1500	1200x1500
Active carbon adsorber		400x1500	600x1500	800x1500	1200x1500
Medicine adding equipment	Measuring pump Medicine adding box	American P026 40L PEBUcket			
Concise filter	Filter core spec	65x500	65x750	65x750	65x750

	fication				
	Filter core number	5	5	7	7
Anfi-filtration equipment (including high pressure pump, RO film, film shell, controlling box, pressure appliance, flow appliance, high-low pressure switch etc.)					
Ro clean equipment (including cleaning pump and cleaning box etc.)					
Size	Length	2600	2600	2600	3600
(anti-filtration	Width	700	700	900	900
part)	Height	1900	2000	2000	2000
