

Product Name :
Sanitary CIP Self-Priming Pump

Product Code :
EQUP-MC20082-0004

Description :

Sanitary CIP Self-Priming Pump

Technical Specification :

The series pumps are specifically designed to handle fluid materials containing a portion of the gas. These pumps are used in a wide range of applications in food, chemical, pharmaceutical and similar applications. Especially in the (CIP) in-situ cleaning system as a return pump.

Material:

All fluid parts, pump casing, pump cover and impeller are made of AISI316L stainless steel. The motor shroud is made of AISI304 stainless steel and is made of EPDM ethylene-propylene rubber.

Over-liquid part material: stainless steel or AISI304

Other parts material: AISI304 stainless steel

Polishing the outer surface: spurting matt

Inner surface: polished

Liquid sealing material: EPDM ethylene propylene rubber, silicone rubber
