

Product Name :
Utilities Air Dryer Machine

Product Code :
EQUP-MC20084-0004

Description :

Utilities Air Dryer Machine

Technical Specification :

Special set of rear cooling and pre-cooling, can be connected directly to the high temperature of 80 ° C or less compressed air.

Refrigerant compressor is equipped with high-performance, high-powered, fully pre-cooling refrigeration, a large amount of 30% than similar products to deal with the wind, dew point temperature stability.

The super design centrifugal and set streaming dual water separator watershed high efficiency.

Easy to use, consumption, low operating costs, reliable and continuous operation.

Pressure Mpa	Inlet Temp ?	Capacity Nm3/min	Power HP	Power supply and voltage V/Ph/Hz	Inlet and outlet size	Cooling type
2-2.6m3	1.1	Rc1?				
3-3.8m3	1.25	Rc11/2?				
4.5-5.2m3	1.65	Rc11/2?				
6-7m3	1.8	Rc11/2?				
8-9m3	2.3	Rc11/2?				
10-11m3	2.45	Rc11/2?				
13-14m3	3	Rc2?				
15-16m3	3.6	380/3/50	air cooling and water cooling	Rc2?		
20-22m3	3.6			DN65Flange		
25-28m3	4.75			DN65Flange		
30-33m3	5.75			DN65Flange		
40-45m3	6.9			DN80Flange		
50-55m3	8.5			DN80Flange
