

Product Name :
Jar Filling Machine

Product Code :
EQUP-MC20086-0042

Description :

Jar Filling Machine

Technical Specification :

Capacity 0-500 pouch per hour
Driven Type Electric
Filling System Fully Automatic
Material Stainless Steel
Packaging Type Filling
Power Consumption Single Phase
Usage/Application Industrial
Machine Type Semi-Automatic
Phase Single Phase

The auger filler machine finds use in many industries such as chemical, food, medicine and other types of industries. These machines are used for filling powder products. It is available in both automatic and semi-automatic varieties. The hardware industry also uses it for various purposes. The collar type machines are very durable and have a strong and rugged built. The design and construction are compact. The operation is easy and simple. The stainless steel machine has a very low maintenance that makes it convenient to use with a long service life. Get the auger filler machine from Ashvani Packaging machines at the most affordable rates. Pouches of different lengths can be used with the machine. The machine cuts and seals the pouches in a very accurate and precise manner to prevent errors and mistakes. The coaster wheels help in moving the filler machine from one place to the other with ease.
