

Product Name :
Batch Coding Conveyor

Product Code :
EQUP-MC20086-0051

Description :

Batch Coding Conveyor

Technical Specification :

Usage/Application Pharma
Material Handling Capacity Variable
Type INK JET PRINTER CONVEYER
Material Stainless Steel
Belt Material PVC
Capacity Variable
Design Customized
Size 300mm x 1.5 Meter

We offer packing conveyor that are designed and engineered to fulfill the needs of any packing environment. Renowned for hassle free performance, it is extensively used for bottling and packaging. Fabricated using stainless steel table top, it contains dimensionally stable belt that is resistant to decay and rot and is flexible despite frequent cleaning. Less stretchable and light weight, the conveyor belt is highly wear resistant and generates very low noise. Customized solutions are also provided as required by the client.

Specification:

- Length: 10-20 feet
- Belt Width: 0-10 inch
